.Self-driven full stack developer with +6 years of experience with .NET technologies mainly ASP.NET 6,, Web forms, .Net 6, JavaScript , html,ASP.NET MVC, SQL server, Azure mainly in developing /maintenance/build from scratch for software commercial products for private organization(Financial, Health care,Startups) Knowledge in leading, mentoring, perform best practices for scalable software(SOLID, Architecture solutions, agile methodologies, TDD) ,problem solver, consumer's issues. I consider myself a technology, learning enthusiast also I like to understand every small piece of the code/project of entire solution of the application, do the analysis, design and propose new way to solve the problem.

## EXPERIENCE

### **Truextend, Lead and Senior Software Developer — 2018-Present**

- Planned, Design, Implement Architecture for the new feature, perform code review, write Unit test, perform Spike
  - Mentorship of new junior team members and monitoring team members with the tasks and fix customer issues
  - Improved the performance of web application by 20% by refactoring the SQL code using sql server execution plan and rewriting SQL code with best practices of SQL server in the existing store procedures and functions.
  - Implemented the best practices of architecture by standard patterns of .net 6 by implementing ONION architecture and Clean Architecture, TDD and Domain Driven Design .
- Tech-stack: c#, asp.net core MVC 6, entity framework 6 core, .net 8 ,Blazor , JavaScript, html, bootstrap4, SQL, SQL server 2012, SQL reporting services 2012, AngularJS, IIS ,nodejs(grunt, gulp to minify the files), Confluence, Gulp ,Web API

### **Jalasoft, Staff software developer — 2014-2018**

- Perform risk analysis for the PBI, send a list of possible risks for the feature development, such as possible performance issues, suggested refactoring to implement the PBI or Feature
  - Improved the fix costumers issues, participate in the scrum meetings, perform analysis, design and implementation of PBI , bug fixing and refactoring the existence code to improve the performance, Training to new developers to team, review and fix consumer issues
  - Reduced the cost of buy new licenses of toolbox of TIVOLI Store(IBM Storage Manager) by 200\$/year for individual license by Implementing C# wrapper of the C library TIVOLI Storage(IBM Store Manager) in the project.
- Tech-stack: c#, .net 4.5 , SharePoint 2013,Sharepoint 2010, asp.net web forms, JavaScript, html, css3, SharePoint programming, Install Shield, Azure DB Cosmos.

### **Jalasoft, Junior Software developer -2012-2014**

- Bug fixing issues, resolve consumer issues, works as support IT in the team, implement features based in the client requirements using scrum framework, perform code review and maintenance current web application.
  - Implemented the Zend Framework in the web site project by 10% of saving team's time of each sprint by investigating and working extra hours adding PHP Zend framework to project for html views, model, controllers and better organization or folder structure of project.
- Tech-stack: Salesforce, JavaScript, html, css3,PHP, Zend framework, MySQL server, visual basic, node.js, Sencha Ext Js.

## SKILLS

**Programming Languages:** C#, Java, JavaScript++,Visual Basic,Node.js, Salesforce Apex programming

**Frameworks and Tools:** PHP, Zend Framework, AngularJS, Sass, Html, jQuery, Bootstrap, SQL , SQL Server 2012, Install Shield ,Entity Framework,ASP.NET MVC5, ASP.NET Core, Jira, Pivotal Tracker, TFS, Azure, Virtualization

**Languages:** English, Advanced; Spanish, Native;

## EDUCATION

**University Mayor de San Simon** – Cochabamba, Bolivia

*Bachelor of Science, Computer Engineering, May 2011*

Microsoft Certification of .net framework desk applications , software engineer basic, Pluralsight certification in asp.net , angular, entity framework and azure bootcamp administration..
